FP7 projects in cultural heritage, digital libraries and preservation

The projects presented on this page result from the first calls for proposals under the ICT programme in FP7:

- ICT Call 1, December 2006 - May 2007
- ICT Call 3, December 2007 - April 2008
- ICT Call 5, November 2009 - April 2010

New projects

The 15 projects selected through ICT Call 6 have started between December 2010 and April 2011. They join the efforts and expertise of 194 participating organisations and are supported with an EU contribution of € 59 mio.

APARSEN - Alliance Permanent Access to the Records of Science in Europe Network

This Network of Excellence gathers a very diverse set of practitioner organisations and researchers in order to bring coherence, cohesion and continuity to research into barriers to the long-term accessibility and usability of digital information and data, and to build a long-lived Virtual Centre of Digital Preservation Excellence. Joint research activities will cover technical methods for preservation, access and re-use of data holdings over the whole lifecycle; legal and economic issues including costs and governance as well as digital rights; and outreach within and outside the consortium to help to create a discipline of data curators with appropriate qualifications.

ARCOMEM - Archive Communities Memories

The vision of the ARCOMEM project is to leverage the Wisdom of the Crowds present in the social web for the purposes of content appraisal, selection and preservation. This will be the basis for creating and preserving archives that reflect collective memory and social content perception and are thus closer to current and future users. The research will be showcased on two example applications, the first for media-related Web archives and the second for political archives.
